

# PADDY SEPARATOR

Paddy separator is mainly designed based on gravity to separate paddy and brown rice from the mixture of paddy and brown rice.

Separated paddy, brown rice and mixture of paddy & brown rice are discharged through three different outlets. This is a heavy duty machine to withstand vibrations, for longer life and for best performance.

Machine operation is controlled by sensor system based on the flow of paddy. Special outlet is designed for checking quality and flow rate. Flow rate can be adjusted by a manual lever with inclination indicator.
